TITLE : PORTABLE TERMINAL OF LIQUID CRYSTAL DISPLAY

ABSTRACT : PROBLEM TO BE SOLVED: To save the labor for the operation to open and close a liquid crystal protective cover by eliminating the hinges of the liquid crystal protective cover as compared to the prior art.

SOLUTION: A liquid crystal unit 4 is packaged to a main body case 3 and closed cell sponges 2A, 2B are stuck to the liquid crystal protective cover 1. These closed cell sponges 2A, 2B are mounted at the liquid crystal window frame of the main body case 3 while the sponges are held shrunk. The closed cell sponges 2 may be embodied by using a rubber-like material including the respective cells and may be usually embodied by coating the surfaces of the sponge materials cut out to necessary shapes with skin layers of the same or similar materials.
